

# Setting up Google Prompt

## First: iPhone users only

1. Download the Google app and open.
2. Sign in when prompted.
3. Once signed in, tap **YES I'M IN**.
4. Choose whether or not to allow Google to access your location. Your selection does not affect 2-Step Verification.
5. Choose whether or not to receive notifications from the Google app.

## Second: iPhone & Android

1. On your computer, click the Google account button in the top right corner of the window (the circle with either your picture or your first initial) and click **My Account**.
2. Under Sign-in & security, click **Signing in to Google**.
3. Click 2-Step Verification and enter your password when prompted.
4. Under Google Prompt, click **Add Phone**, and then click **Get Started**.
5. Your phone should be listed. If you have multiple phones setup, select the phone on which you installed the Google app. Click **Next**.
6. On your phone, the Google app asks if you are trying to sign in.
7. Go to the Google app on your phone and tap **Yes**.
8. On your computer, the sign in completes. Click **Done**.
9. Google prompt will be set as your default second step.

## Things to Remember:

- Once setup, Google Prompt is your second step.
- If you setup Google Prompt, you will not be able to use a security key as your second step.
