

Adding a Course Evaluation Link in Moodle

You can add a link to course evaluations within your Moodle course. The link is personalized for each logged-in user: students are provided the same link they've received via email invitation; faculty are provided with a summary page.

To add the course evaluation link:

1. Turn editing on with the button in the upper right or the link at lower left.
2. Click "Add an activity or resource" within the section in which you want to post the link. We suggest the summary section at the very top of the course.
3. Select "EMU Course Evaluation" from the "Activities" section of the "Add an activity..." pane, then click the "Add" button.
4. The system finds the scheduled course evaluation that matches your Moodle course. Click one of the "Save..." buttons at the bottom of the screen to accept the matching evaluation link. (If the system cannot find a matching course evaluation, email helpdesk@emu.edu with the name of non-found course.)
