

ABOUT - INTERDISCIPLINARY STUDIES GRADUATE PROGRAM

Established on the principle that solving problems and producing knowledge in the 21st century often requires crossing disciplinary boundaries, the Master of Arts in Interdisciplinary Studies student is an active participant in proposing a curriculum that supports an individualized and scholastically rigorous academic goal while customizing coursework to their specific areas of interest.

Students may choose classes from the existing curriculum within our graduate programs, in an undergraduate course with a master's-level syllabus, through the creation of new classes within a graduate program, or directed studies with faculty offering mentoring and training in an area of expertise.
